

SOC + IT Helpdesk Ticketing Lab

Incident Investigation Evidence & Portfolio Documentation

1. Project Objective

Demonstrate a realistic SOC L1 workflow by using Wazuh to investigate Windows authentication failures and GLPI to document, assign, investigate, and resolve the incident.

2. Incident Summary

The lab generated Windows Event ID 4625 authentication failures. Threat Hunting identified five relevant events during the investigation window. Events were observed on the Windows endpoint and the lab Domain Controller. The Domain Controller events were validated against the test account. The analyst documented the activity as suspicious repeated authentication failures, while avoiding an unsupported conclusion that the activity was confirmed brute force.

3. Investigation Workflow

Wazuh alert review

Event ID 4625 validation

Threat Hunting and event correlation

Target account validation

Severity/priority assessment

GLPI incident ticket creation

SOC L1 assignment

Evidence and analyst notes

Resolution and ticket closure/solve

4. Evidence Screenshots

01-threat-hunting-5-events.png

Threat Hunting showing five failed-authentication hits.

02-wazuh-4625-event.png

Wazuh Event ID 4625 event details.

03-event-target-user.png

Event details confirming the target test account.

04-wazuh-rule-60122.png

Wazuh rule details for the failed-authentication alert.

05-glpi-ticket-initial.png

GLPI incident ticket and initial description.

06-glpi-initial-triage.png

GLPI initial triage / analyst assessment.

07-glpi-investigation-update.png

GLPI investigation update with correlated evidence.

08-glpi-resolution.png

GLPI resolution statement.

09-glpi-final-ticket-list.png

GLPI final ticket list / workflow state.

5. Analyst Conclusion

The evidence supports repeated failed authentication activity, but it does not by itself prove a brute-force or password-spraying attack. The incident was therefore documented as suspicious failed authentication and retained at a moderate severity/priority, with continued monitoring recommended.

6. Portfolio Notes

All screenshots in this package have been processed for public sharing. IP addresses, hostnames, and lab account/domain identifiers were blurred where detected. Review the images once more before publishing if you add any new screenshots.
